

Fiix CMMS Health Check: Drive maintenance performance by making the most of your CMMS

What is a Fiix CMMS Health Check?

You've invested a lot of time and money in setting up and using Fiix. A CMMS Health Check is a way to figure out if you're maximizing this investment. It's an in-depth audit of how your team is using Fiix. This helps us create and put in place a personalized improvement plan for your organization so you can optimize your CMMS and the work you do with it.

Why do a Fiix CMMS Health Check?

A Fiix CMMS Health Check helps you identify roadblocks and prescribe solutions specific to your organization. No two maintenance teams will get the same benefits. But here are some examples of how a Health Check has helped other companies make the most of their CMMS:

- Training users on best-in-class strategies for using Fiix in the field
- Uncovering features or integrations your team is not using, but align with your goals
- Increasing user adoption of Fiix and ensure organizational knowledge is stored in the CMMS
- Finding reports, metrics, and data to help you measure maintenance performance and tell the story of your team's success
- Discovering where processes or workflows can be improved to remove bottlenecks and capture better insights into costs, performance, and more.

How does a Fiix CMMS Health Check work?

Our CMMS experts will guide you through the five steps of a Health Check, which include:

1. Conducting interviews with technicians and managers to understand how Fiix is used, the goals of the team, and any challenges that exist
2. Completing a comprehensive review of the system and calculating its health score
3. Identifying features, functionality, processes, and integrations that could be used to improve your CMMS and team efficiency
4. Providing training on CMMS functionality that is currently not being used and retraining system administrators on all required CMMS modules
5. Building a tailored, long-term plan to improve the usage of the CMMS with specific recommendations and action items

How do I book a Fiix CMMS Health Check?
